4th-Year Student of the Faculty of Military Education of TDPU named after Nizami

ABSTRACT

In this article, nowadays, this science serves to educate young people in schools in the spirit of military patriotism and to love the motherland, to protect our country with bravery, and to train them as military potential personnel.

Keywords, youth, homeland, pedagogues, bravery, courage, patriotism.

Continuing the reforms in the Armed Forces of the Republic of Uzbekistan, the head of our state Sh. Mirziyoyev: "Education of highly qualified military personnel who are fully and thoroughly prepared, loyal to their homeland, guaranteeing social protection of the nation by the state is a decisive and main factor in achieving the intended strategic goals and fully implementing it in life. Therefore, practical work has been started to implement and strengthen the science of patriotic education in all educational institutions of the republic," he said.

To train military personnel in our republic, their military skills great importance is attached to increase. Military academies, by types of troops the opening of military schools is a clear proof of our opinion. State borders Our people are being vigilantly guarded by our troops he is raising his military spirit. This is how a real independent state works does not leave its defense in the hands of others. The general military spirit of the people from our ancestors to us in raising and raising soldiers to be strong and courageous dissemination of inherited military knowledge, military training of the secrets of military art teaching in their countries is also an effective factor. As we educate the youth up to every calling, we are the first we will have to enrich the political consciousness of young people. In this regard, we are the state based on the laws and regulations issued by Uzbekistan There are a number of laws and regulations of the Republic, and this law is the regulations mainly regulatory documents are maintained. For example: Republic of Uzbekistan Constitution, General military obligation and military service Law, Law of the Republic of Uzbekistan on Defense and Uzbekistan We can take the regulations and laws of the Armed Forces of the republic as the basis. In addition to these, general education in inculcating our youth in the spirit of patriotism until convocation in schools and secondary special, vocational educational institutions teaching of primary education is one of the main factors. Defense Entering the higher military educational institutions of the Ministry of Education and Armed

Preparation for military service in all types of military service of our forces

Our young people attend general education schools and secondary special and vocational education necessary in the process of initial preparation before the call-up in institutions they get education and get information that they are interested in. This kind of education-training process is carried out by the military leader and the pedagogic team of general education schools

and secondary special and vocational educational institutions. to be carried out by teachers of primary education in cooperation condition. Therefore, pedagogy in performing such urgent tasks by itself military leader and conscript of the team of military faculties under the university on the training of teachers of primary education quality performance of obligations and tasks is of particular importance. In this regard especially the science of organization of military education and its methodology before conscription in training, the strategy of reforms carried out in our Armed Forces with a deep understanding of the essence, the most modern teaching methods and education using the latest developed models of technical means, as well as ignoring the new demands of our rapidly changing times we must not leave it. Organization of military education before the draft and his methodology is one of the main ones of special military training of students is considered This subject is "Primary training subject before convocation" included in the state exam as a component of the methodology. Special subjects the main goal of teaching is to improve the military-pedagogical training of students and training in the subject of primary training before the draft during the transfer, it is focused on the formation of practical skills. Learning this science of the Republic of Uzbekistan "All-military obligation and military service

"On" the requirements of the law, to call up young people of the Republic of Uzbekistan the regulation on primary education, Republic of Uzbekistan

Follow the orders and directives of the Ministry of Defense, before the draft organization and conduct of training, patriotic upbringing of students work, preparation for service in the Armed Forces of the Republic of Uzbekistan

issues, initial preparation before the call-up (before the call-up planning the educational process in the subject of primary education.

principles, the science of primary training in educational institutions up to convocation organizing and conducting training in all sections of the program

the use of new pedagogical technologies, modern educational equipment ability to use, director of the educational institution and preparation for the Convocation

teacher's obligations, communication with cooperating organizations forms, training in the subject of primary preparation before the draft -

know the requirements for the material base and be able to apply them in practice

is to provide sufficient knowledge and skills for Students are studying

At the time of the military leader, the young people of the Republic of Uzbekistan were armed

In fulfilling his obligations regarding the issues of preparation for service in the ranks of the forces the necessary political, moral, spiritual training and the Motherland must embody the qualities of a defender. Currently, our Armed Forces personnel with thorough knowledge of military units and departments filling with, to his political, spiritual, moral and spiritual patriotism education paying special attention is one of the important conditions. Personal content only to form and nurture the qualities and qualities mentioned above educational institutions of military personnel training, unit commanders and military chiefs it will not be correct to consider it as a task. It is known that he is in the army commanders and chiefs are responsible for the activities of their subordinates. But quality and education up to the ranks of the army when it comes to character building

place is very important. Especially general education schools, secondary special and high schools

high-quality and high-quality preparatory science in vocational education institutions The importance of effective training is important in this regard. First President As stated by I.A. Karimov, "To make the young generation loyal to the country, the motherland, faithful, brave and brave, highly skilled, highly spiritual people

educational centers have a special place in education". in general education schools, secondary special and vocational educational institutions About the training of "Preparation before the draft" of the Republic of Uzbekistan in Article 13 of the Law "On General Military Obligation and Military Service". it is written as follows: "Initial training before the draft, including compulsory subject in the training program for civil defense are teachers of preparatory subjects in general education institutions

starting from courses or classes on the eve of the graduation year

In addition, these priority tasks of the Republic of Uzbekistan In the laws of "National Personnel Training Program", "On Defense" and In the orders and requirements of the Ministry of Defense of the Republic of Uzbekistan

It can be seen that since January 1999 in the Armed Forces our country is peaceful, capable of reliable and effective protection of peace, fast, good

Only the supreme military can fulfill the purpose of creating the armed forces thinking that it is the task of educational institutions is only a one-sided view of the issue.

In this regard, the initial preparation before the call is of great importance.

DISCUSSION AND RESULTS

Improvement of the science of primary training before the convocation and development, the purpose of the science of primary preparation before the Convocation that a number of scientific researches are being carried out in the course of his duties, the state

that its borders are vigilantly guarded by our troops It is not wrong to say that it is the result of our scientific work. Our youth in the spirit of patriotism

education is one of the current issues of our youth What should we pay attention to in terms of education in the spirit of patriotism?

What kind of research should we do? The first issue in this regard to correctly explain to our young people the ways our ancestors walked (convince

method). The second issue (education) is if we educate our youth in the spirit of patriotism if we can educate, we can say that we have laid an immovable foundation for the future. The third issue (teaching and teaching) is one of the most urgent issues. How much we If we teach our young people correctly, they will regain their self-confidence

we will wake up once. To educate our youth as military patriots First of all, we teach them our national values. This it will have a great effect on the education of our youth as military patriots.

Current has a great influence on the changes of the rapidly changing times changes in science, technology, and issues of their management by explaining their interest in managing military equipment we will increase. In this regard, we need to prepare for the call helps. In this article, the subject of primary preparation before the Convocation by providing information about the purpose and task of the science scientific research was conducted to find its function. Until the

call primary training subject of the Armed Forces of the Republic of Uzbekistan. It is proved based on theoretical knowledge that it is a component. Because this science To prepare the main reserve of the Armed Forces of the Republic of Uzbekistan is a helpful science and to fill it with knowledgeable and educated young people serves.

CONCLUSIONS AND RECOMMENDATIONS

Summing up from this article, it can be said that in the article Call information about the purpose and function of the subject of primary preparation given. In the introduction of the article, military personnel in our Republic that great importance is attached to training and improving their military skills along with providing information about military academies, army also information about the opening of military educational institutions by types given is a clear proof of our opinion. Our own troops of the state borders the military spirit of our people is being vigilantly guarded by This is how a real independent state manages its defense does not leave it in the hands of others. In raising the general military spirit of the people, It is a legacy from our ancestors to educate the military to be strong and courageous popularization of remaining military knowledge, military study of the secrets of military art teaching in their countries is also an effective factor. This article is forthcoming I believe that it will be the basis for the development of military education before the draft.
