ABSTRACT
Present study has been carried out on 100 secondary level student of Bareilly district. The main objective of this study was to explore the career preference of secondary level students and further it was also explore whether their career preference were influenced by their Sex, type of school, and parents occupational status. The study has been conducted through survey method and to measure the career preference of secondary level students career preference record (CPR) developed by Vivek bhargava and Rajshree Bhargava was used. As per the findings of this study it may be recommended that attempts should be made by school and colleges to arrange guidance and counseling for career choice for students.

KEYWORDS: career, objective.
