INTRODUCTION

Independence in Uzbekistan created many opportunities for the development of science. In all areas, the main attention was paid to the development of the material and technical base, based on the requirements of the times. The social activity of intellectually capable scientists, including scientists, who are the main objects of the development of science, has increased by this period. Therefore, since the first years of independence, a non-governmental non-profit organization focused on supporting the scientific and creative activities of women, the Women's Association of Uzbekistan "Olima" was established in 1992 by a group of science devotees, scientists and public figures of the republic.¹

This organization brought together women in the Republic, regardless of their race, nationality, religious belief, political views, age, academic degree and title, engaged in scientific and educational activities in certain fields of science. Also, the "Olima" association is dedicated to women who have scientific degrees and titles, who are engaged in scientific and educational activities to help solve the economic, social, national, ecological, and legal problems facing the country, who contribute to the development of international humanitarian cooperation in the interests of peace and security is to join forces.

The association has set itself the following tasks:

- promotion of union peace and friendship in the republic;
- to promote abroad the achievements of republican scientists in the activities of the association;
- carrying out charity and sponsorship activities in accordance with the established procedure, conducting contests, conferences, trainings, scientific seminars, forums, general meetings based on the goals and tasks of the association's charter in the territory of the republic, enriching the material and technical base and financially strengthening the association in order to conduct its work efficiently. implementation;
- cooperation with all national and international organizations fighting for the implementation of the slogans of equality, development and peace of the UN Women's Decade, protection of the interests of members of the association in international non-governmental organizations, practical instructions and other activities in the programs of international organizations, associations and associations participation in the event, establishment of practical relations with the Republic of Uzbekistan, the CIS and foreign countries on issues within the scope of the association's activities. Academician of UzRFA, doctor of chemical sciences, professor Sayyora Sharafovna Rashidova worked as the first chairman of the association for many years. During this period, the process of applying the results of science to production was launched, and international relations developed. Since 2009, the Uzbek women's association "Olima" has been founded by Ph.D., professor R.H. Murtazaeva is conducting his activities under the leadership.

"Scientist" association will involve scientists working in the network of the Academy of Sciences, republican higher education institutions, and women scientists working in the field of secondary special education. In the following years, the association "Olima" included women scientists, young researchers from the whole republic in its activities. Secondly, in the current period when the civil society is being formed, in its activities, the entire population of the republic pays special attention to the issues of raising the intellectual potential of the population to a higher level, further expanding the possibilities of the association, and bringing women to the stage of world science.

The "Olima" association unites all the scholars in Uzbekistan and has adopted the main motto of working with unity and harmony. One of the main goals of the association is to attract the young generation to scientific research using the scientific potential formed in the republic, to promote this idea among girls, to widely promote the scientific achievements of leading and young scientists in scientific centers of the republic and abroad, and to help them develop their scientific potential. In recent years, the members of the management of the association continue to organize the activities of women scientists not only in the republic, but also in the international arena, and support their initiatives. In a series of events held by the "Olima" association, all women living in Uzbekistan, in particular, to increase the political and social activity of scientists, to achieve professional maturity, to improve international relations, to inculcate in the minds of young people the essence of comprehensive social, spiritual, political and economic reforms carried out in the republic targeted activities are being carried out, relevant recommendations are being developed.²

In the Management of the Association of Scholars, the Association for International Relations became a member of two prestigious international organizations. One of them is an international organization called INWES (International Relations of Women Engineers and Scientists), and the other is TWAS - International Academy of Sciences of Developing Countries. INWES is an international organization that unites women in more than 40 countries (engineering, mathematics, science and technology). The development of international relations greatly contributes to the scientific work of female scientists in our country, ensures that they work in cooperation with different countries and demonstrate their scientific achievements at international conferences.

The goal of INWES organization is to build a bright future for girls and women working in the fields of science, technology, engineering and mathematics in the world thanks to their fulfilling work. INWES covers 11 regions of the world, including North America, South and Central America, Western Europe, Eastern Europe, African countries, Central and Western Asia, Southwest Asia, Eastern Asia, and Australia. This organization is also involved in preparation of international and local projects, exchange of information, protection of women's rights. The main activities of the INWES organization include organizing conferences, supporting local events, communicating about women's scientific research in the fields of science and technology.
