ANNOTATION

This article provides a scientific overview of the teaching of German language based on innovative technologies and provides scientific information. In the course, the effectiveness of innovative technologies and their effectiveness will be further demonstrated through a number of examples.

Keywords: technology, information technology, information communication, pedagogical skills, e-textbook, efficiency, skill, German language.

INTRODUCTION

With the rapid development of information and communication technologies, which is one of the peculiarities of our time, special attention is paid to a new approach to the educational process and its organization, using its potential. The XXI century is the age of high technologies, and our modern youth is not only in line with the spirit of the times, but also in line with the development of the electronic world. Therefore, it requires a different approach to the process of educating the younger generation. The role of the teacher in the classroom is also changing. The teacher is now mainly a facilitator. It is time for teachers who want to keep pace with the times to be ready to bring any part of the lesson to life through ICT. The introduction of information and communication technologies in the educational process is becoming increasingly important, especially in the teaching and learning of foreign languages. New information technologies offer great opportunities for teaching foreign languages, play an important role in obtaining quality knowledge in science and increase the effectiveness of education. It is well known that in accordance with the requirements of the time, no lessons in this subject should be given without the presentation of the teacher or students.

In today's fast-paced world, science and technology are also growing rapidly. Progress in every field is moving forward. In particular, great changes are taking place in science. Delivering each subject to students using new innovative pedagogical technologies is one of the main requirements of today's education. Especially after the adoption of the Resolution of the First President of the Republic of Uzbekistan Islam Karimov dated December 13, 2012 No. PP 1875, the attention to the teaching and learning of foreign languages in our country has increased. A new stage, a new era in the teaching of foreign languages has begun in our country. The teaching of German language requires the use of advanced pedagogical technologies, interactive, innovative methods, communication and media. New methods and requirements for teaching the German language in our country have been developed in accordance with the Recommendations of the European Framework for Assessment of Knowledge and Skills of

German Language Teachers (CEFR). According to him, textbooks have been created for students of secondary schools and vocational colleges. In accordance with these requirements, classrooms are equipped with stands and new information and communication technologies.

The demand for learning German is also growing. German language science is divided into four aspects (reading, reading, listening comprehension and speaking), each of which is given a separate concept and skills. Educational technology is the effective use of modern information technology in the educational process. It also aims to improve the quality and effectiveness of education through the introduction of modern innovative technologies in the educational process. In particular, there are several advantages to using such information and communication technologies in learning German. The role of modern technology in language learning and teaching is invaluable. The use of technology is useful in every aspect of German language learning (reading, writing, listening comprehension and speaking). For example, to listen and understand, of course, it is impossible to do this process without a computer, player, CDs. Listening is one of the most important parts of language learning. This requires the student to pay attention to the speaker's pronunciation, grammatical rules, vocabulary, and meanings at the same time. An important factor in the use of modern technologies in the educational process is the ability of students to know and use information and communication technologies. One of the most effective ways to teach and learn German is to use modern technology. In this process, including: using computers, the student can watch and listen to German videos, demonstrations, dialogues, movies or cartoons; you can listen to and watch German-language radio broadcasts and television programs; the use of tape recorders and cassettes, which are more traditional methods; CD players are available. The use of these tools will make the process of learning German more interesting and effective. In the process of globalization, it is hard to imagine our lives without the internet. One of the most effective ways to learn and teach German is to use it effectively. You will be able to communicate with German speakers via the Internet. Writing exercises can be improved by writing a letter via e-mail. The most important issue is the introduction of modern communication technologies in the educational process, their purposeful and correct, effective use, through which the student's interest in the German language, to increase the effectiveness of teaching. This will allow for the use of innovative educational technologies and increase demand.

There are several types of innovative educational technologies available today. When they are used extensively and in a variety of ways to cover a topic in the classroom, the effectiveness of the lesson is high and the interest of the students in the lesson is increased. It is intended to increase the effectiveness of education through the introduction and implementation of innovations in the educational process. The use of a variety of role-playing, action-packed games in the teaching of German language classes will increase the interest in both the lesson and the language learning. By working in pairs or small groups, it helps students to communicate with others. The use of graphic organizers in the educational process is one of the most important visits in the coverage of the topic and its delivery to students. It is also possible to use several different graphic organizers to illuminate a theme.

When teaching German, it is useful to use graphic organizers to explain new words and grammar rules. These can be easily memorized by graphic organizers. The use of different

tables in the process of teaching German is also very effective. Using tables in the learning process, students can follow a specific grammatical rule, such as composing sentences using tenses and placing new words. At a time when the need to learn German is high, the effective use of modern information technologies, innovative educational technologies in the educational process makes this process more effective. The effectiveness of innovative educational technologies lies in their correct and effective use in the educational process.
