Keywords: Preschool education, main tasks, the rich national, historical heritage of the people, stage, pedagogue, cultural, children, school education, physical, mental, emotional.

INTRODUCTION

The preschool education stage is the most important, responsible stage of continuous education, the foundation and foundations of child upbringing and education are formed. The main tasks of preschool education are to educate children in the spirit of the rich national, cultural, historical heritage and spiritual and moral traditions of the people, to form a sense of national patriotism in children, to form a need for knowledge and a desire to study in preschool children, to prepare them for the educational process on a regular basis, to develop children's thinking, to form the skills of independent and free expression of their own thoughts, to ensure the physical and mental health of children. At this stage, the issue of preparing children for school education is one of the most urgent issues. It is with this in mind that fundamental changes are being carried out in our country today in the field of preschool education, in the field of preparing children for school education. In the field of preschool education, the work carried out with the active initiative of our President Sh.M. Mirziyoyev, the decrees and decisions adopted are of great importance. Resolution No. 2707 of the President of the Republic of Uzbekistan "On measures to further improve the preschool education system in 2017-2021" (December 29, 2016), "On the management of the preschool education system" The adoption of official documents such as Decree No. PF-5198 (September 30, 2017) "On measures to radically improve the preschool education system" and the "Concept for developing the preschool education system of the Republic of Uzbekistan until 2030" play a special role in improving the quality and efficiency of education in the preschool education system. Preparing children for school education has a number of criteria. In this process, preparing children for school physically, mentally, spiritually, willfully and spiritually is one of the foundations that ensure their stress-free school education, continuity and efficiency of education. The scientific and methodological support of future teachers and their professional training are among the main issues in improving the process of preparing preschool children for school education. In particular, the physical characteristics, anthropometric indicators, mental and volitional aspects of children, and their spiritual readiness for school are considered important for their intellectual and physical adaptation to school education, and

for their mastery of subjects without stress. In preparing children for school, it is important to rely on methodological knowledge in this regard, to be based on a clear system and sequence. The main goal of the subject “Methodology of preparing children for school education” is to familiarize future preschool educational organization employees - educators with modern technologies related to the scientific and theoretical foundations, methodology and practice of preparing children for school education in preschool educational organizations, and to provide instructions on the use of educational technologies and didactic methods in this regard.

A person, his all-round harmonious development, the creation of conditions and effective mechanisms for the realization of personal interests, changing outdated thinking and patterns of social behavior are the main goals and driving forces of the reforms being implemented in the republic. The formation of an excellent system of personnel training based on the rich intellectual heritage of the people and universal values, on the basis of the achievements of modern culture, economy, science and technology is an important condition for the development of Uzbekistan. Preschool education is a healthy, all-round development of a child provides formation, instills in it a sense of desire to study, prepares it for regular education. Preschool education is carried out in state and non-state preschool educational organizations and in families until the child reaches the age of 6-7. Neighborhoods, public and charitable organizations, international foundations actively participate in the implementation of the goals and objectives of preschool education.
