Spirituality is a complex of qualities, mutual trust, respect and attention between people, noble aspirations for the joint construction of the future of the people and the state.

**Sh.Mirziyoev****ABSTRACT**

Ask spirituality in a word, this is the face of every state. because if you go to a developed state where you want, then in someplace it is assessed depending on the spirituality and culture of the people about what kind of state it is. And spirituality can be determined by the origin of the religion and language of each state.

In this regard, the distinguished president of our country is speaking in every report, Apart from him, a mature scientist will take an example from our grandparents. In the work of his new Uzbekistan strategy, he also introduced a chapter on spirituality as a separate topic. In it, the introductory word began with the following words. “ In my opinion, there is a great illumination of the world of mankind –the flash of spirituality.

The difference between this lamp from others is that it illuminates the mind and thinking of a person, evokes his soul, conscience, a sense of humanity kuchaytiradi.

As we begin to create a new period of awakening in Uzbekistan, it is necessary that such a ray of spirituality shines in the hearts and minds of every citizen and encourages him to live with a high sense of responsibility, motivating him to good deeds.” From the above views of the president of our autonomous republic, we can realize that today a new worldview has been formed in our people. That is, the people realized that the state began to work for the people, and not for the state and that this was consciously understood by our people, and in the first place at the time of the reforms carried out, the spirituality of man lies in his dignity. Today, the development of our state has proved once again that our citizens are also ready to get out of the way of every ore. While raising spiritual youth, today we need to promote spirituality and religion again to the educational system. While we do not teach human rights again to the younger generation, the consciousness of today's young people drops its spirituality with secular information on the phone. The president of our country warned that in his works there are various threats in the field of enlightenment, the level of evolutionary development of the dynamics of changes in our spiritual life in today's world, the implementation of the general laws inherent in it, and the need to pay special attention to the peculiarities associated with it. In addition to this, today's news Rascal is telling in each of his lectures that it is necessary to look for ways to return our children who are falling under the influence of various destructive ideas. Our future youth is calling on all of us to save them from various threats such as terrorism, extremism, transnational and cybercrime, trafficking, drug trafficking. Because the risk of these things is constantly increasing. In addition, today there is a gap in our spirituality. And this, of course, has a huge impact on the role of education and upbringing. If there is parental education at home, then the role of education in education is declining. If we look at

our youth today. Unfortunately, they do not recognize our national identity, our great ancestors, and for a person who considers himself to be an Uzbek child, this does not necessarily correspond to our national identity. In his new work on the strategy of Uzbekistan, the president of our country expresses the following thoughts “ ” we must transform the New Uzbekistan into a country where a mature spiritual society, free and happy people live. This article in the context of the ongoing large-scale reforms in the Republic of Uzbekistan and the need for an accelerated renewal of fixed assets, leasing is of particular importance as a form of financing the investment activities of economic entities.

Only from the physical point of view, it is not so difficult to educate a man in a squat. But to perfect a person both physically and spiritually is an incredibly difficult task. Especially today – This issue is incredibly important in the present tense of ideological struggles Goh transparent, in the delicate conspiracies of which Goh is pinched. The purpose of the strategy we are presenting is to preserve and elevate our national identity, our centuries-tested traditions, our vital principles such as living with faith. The idea of limiting the boundaries of "civil society" and "state" was proposed by the German philosopher G. Hegel. It should be noted that society and “civil society” is generally a state term.

With the same muonsabat, the concept of “New Uzbekistan –enlightened society ” and the national program for its implementation will be developed. First of all, this is the statement of enrichment and development of our national-ideological foundations by the requirements of the era, thereby achieving the spiritual growth of society. ”

From these words, we can understand that our reforms in the field of spirituality indicate that our spirituality today does not have to fight against external alien ideas. Education means that our spiritual work in education is outdated, as well as that our young people today are much ahead and do not have a clear idea of themselves. Renesas, which are being put forward by our compatriots, show much more strength in raising our spirituality. And we will enter New Uzbekistan through the Renaissance. Because we have forgotten our great signs today. Or maybe we just got away from the book. When you read the works of each of our mature scholars, of course, the first place will be addressed, or the main purpose of the work is aimed at education and spirituality. If we can find a way to multiply our spiritual activities into the human soul, then we can achieve our thought-provoking intentions, for this, we will all have contributed to the development of our state if we can jointly fight and organize spiritual events in an interesting and motivating way and adhere to the rules of morality.

In place of the conclusion, we can say that if we read or read every work produced by our compatriot to our people, we can wake up the love of the motherland to the land in the hearts of people through this. Because we will have information about the reforms, achievements and great thinkers carried out in our country in all the centuries of our President. I want to finish the article with the words of wisdom of the ancient Greek philosopher Socrates. “A person who wants to change others must first of all change himself. For this, it is necessary to have a clear goal, Tolmas will, and constant research.
