National Guard of the Republic of Uzbekistan

ANNOTATION

This article discusses the innovations in the insurance system, the use of which will help mankind to facilitate various tasks.

Keywords: digital technology, insurance, online mode, email, customers.

INTRODUCTION

It is well known that the 21st century is the age of digital technologies and globalization. Insurance, one of the key indicators of economic change, is no exception. The use of the Internet in the insurance industry is very popular today, which is especially true for the insurance system.

This can be seen in the fact that the National Insurance Company "Uzbekinvest" is making large-scale changes. The company is constantly working to improve the quality of services and create convenience for existing prospective customers. In this regard, from the summer of 2019, a new project has been launched, which will allow all residents of the country to insure online via the Internet and use its innovations. The launch of the project was an important step in improving the quality and efficiency of services. Thanks to this service, the insurance system in Uzbekistan has become very convenient and fast. You no longer need to visit the office to register your insurance - all processes are done online. Through the portal you can see what types of insurance are issued, as well as what is the modern form of insurance.

Offers the following benefits to customers who purchase insurance products online:

1. Maximum time to register without visiting the office of the insurance company;
2. Minimum delivery time (free delivery within 5 working days);
3. Various methods of payment for services, including payments through terminals and Click, Payme systems;
4. Consultation by telephone and e-mail on insurance services and its registration.

Through the portal, you can apply for CASCO motor insurance, health insurance, comprehensive travel insurance, voluntary and compulsory insurance online.

It should be noted that today, when the country is on the threshold of a single information space, Uzbekinvest Insurance Company serves as a key component of the economic infrastructure and plays an important role as an economic factor. One of the news is that the decision will introduce a single online information system for compulsory motor third party liability insurance. A new type of compulsory insurance policy will be introduced. Previously issued insurance policies will remain in force until the expiration date. The Regulation on Amendments to the Regulations on the Principles of Operation of the Disaster Insurance Institution was published in the newspaper dated 26.02.2015.

It is necessary to amend the Regulation on detection, notification, registration of incorrect insurance practices and the Regulation on the procedure and principles of combating these practices. The regulation was published in the Official Gazette on 28.02.2015.

The Regulation on Amendments to the Statute of the Insurance Training Center was promulgated by the Treasury Adviser on 28 February 2015.

In short, there are many options available today, such as online insurance, which makes people's work easier. When managing such online affairs, it is important to know the news about them. Because news teaches a person a new way of life.
